ABOUT ME

My time on this planet I want to be to the benefit of everyone. I have a passion for trying to always positively, powerfully affecting others. Whether that be through software from afar or mentoring up close. By training, I am a computer scientist, but at my core I am a powerful geek who believes the best work comes when we genuinely care. I embrace the discomfort of pushing past my limits, and encourage others to do the same, because that's where real growth lives.

WORK HISTORY

Software Engineering Intern (Machine Learning Research)

Beckton Dickinson

Sep 2025 – May 2026 San Diego, CA

- Design and implemented a real-time CNN-LSTM Hybrid model machine learning algorithm to detect waveform anomalies on waveforms for the purpose of module fault detection for the Alaris PCU.

Integration Engineer

Noblis MSD

Mar 2020 – Nov 2023 San Diego, CA

- Developed a tool for the U.S. Navy and Marine Corps which would automatically run scripts (Powershell, Python w/ Selenium, Javascript or BASH) in order to securely harden systems to DoD specifications across all classes of deployed ships and green gear.

Information Systems Technician, 2nd Class

U.S. Navy

Jan 2014 – Mar 2020 Norfolk, VA

- As a Training command staff systems technician, I deployed to ships and did pre-deployment systems analysis and training to sailors and marines to ensure all ships were manned by fully qualified technicians. Verifying certifications,
- Cryptologic Keying material custodian, Cryptologic Systems hardening, Work-center Supervisor to 8 personnel within Top Secret spaces

EDUCATION

M.S. Computer Science

2026 – Ongoing (GPA: n/a) Northeastern University

Bachelors, Computer Science

2023 – 2026 (GPA: 3.75) University of San Diego

CERTIFICATIONS

CASP+ (SecurityX) Security+ VMWare

SOFT SKILLS

Team Leader Team Work Research Mentorship

TECHNICAL SKILLS

Machine Learning Python Java C Java LaTeX VMWare CyberSecurity Cryptography
